

Thank you for purchasing our Ariel Voice Generation asset.

This document will show you how to use the asset in Unreal Engine.

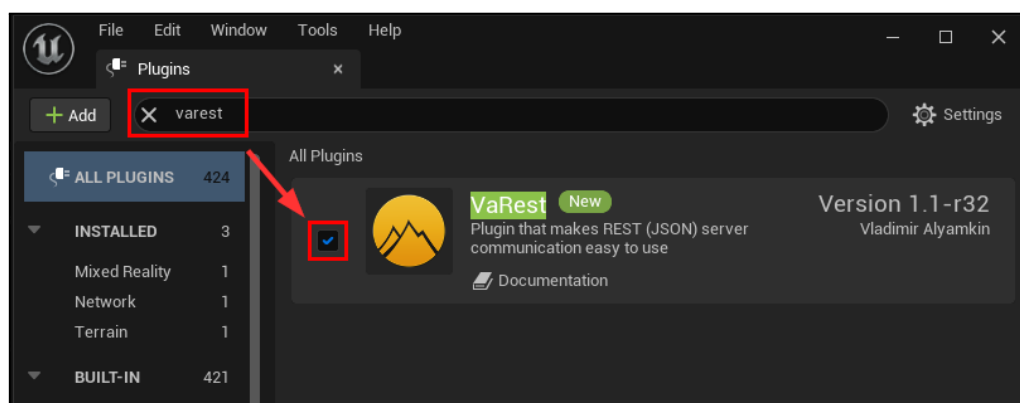

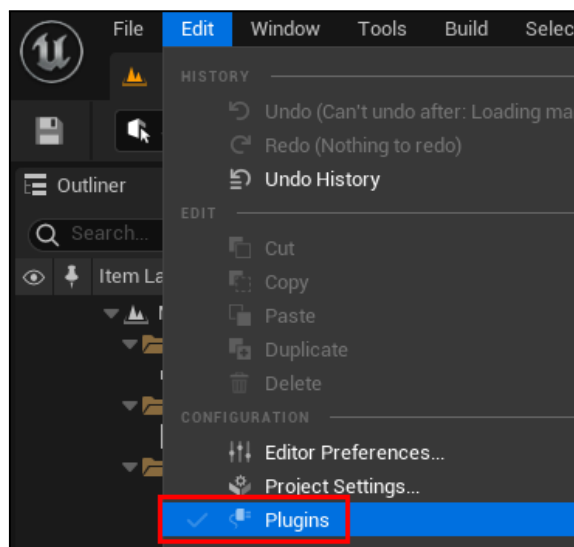

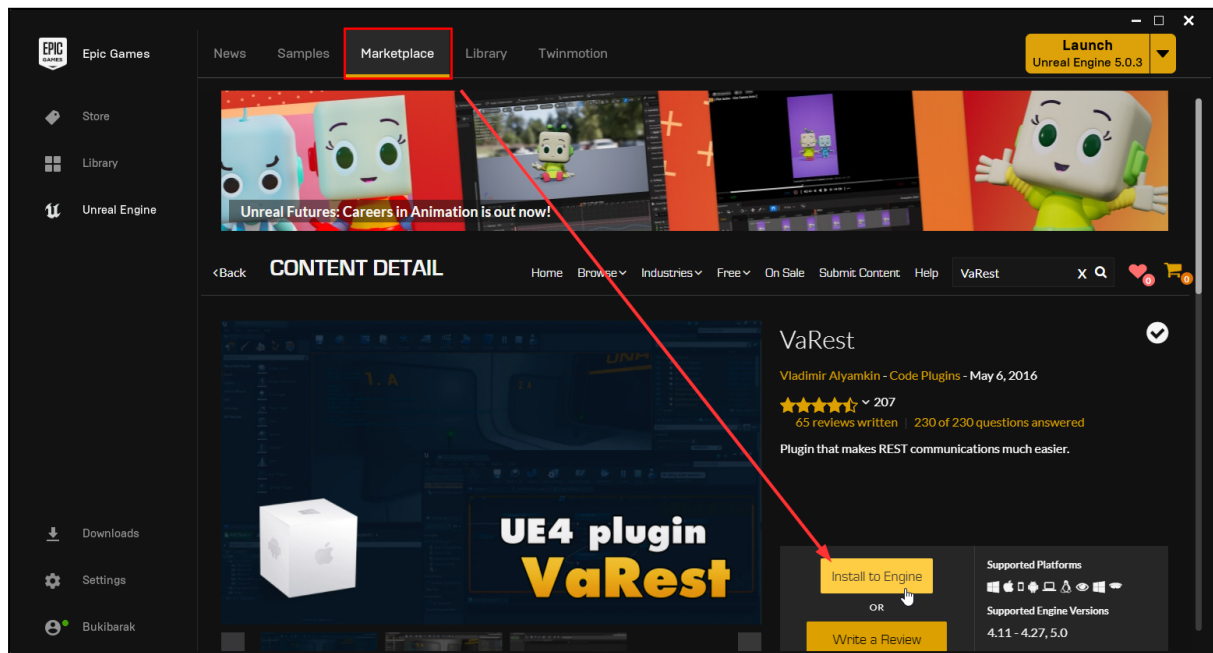

If you have any question, contact us at : contact@xandimmersion.com

Glossary

- 1. Prerequisites**
- 2. How to install the Ariel plug-in**
- 3. How to use the Ariel plug-in**
- 4. Error fixes**
- 5. Speaker list**

1. Prerequisites

Install “VaRest” plug-in (free) and add it to your project:

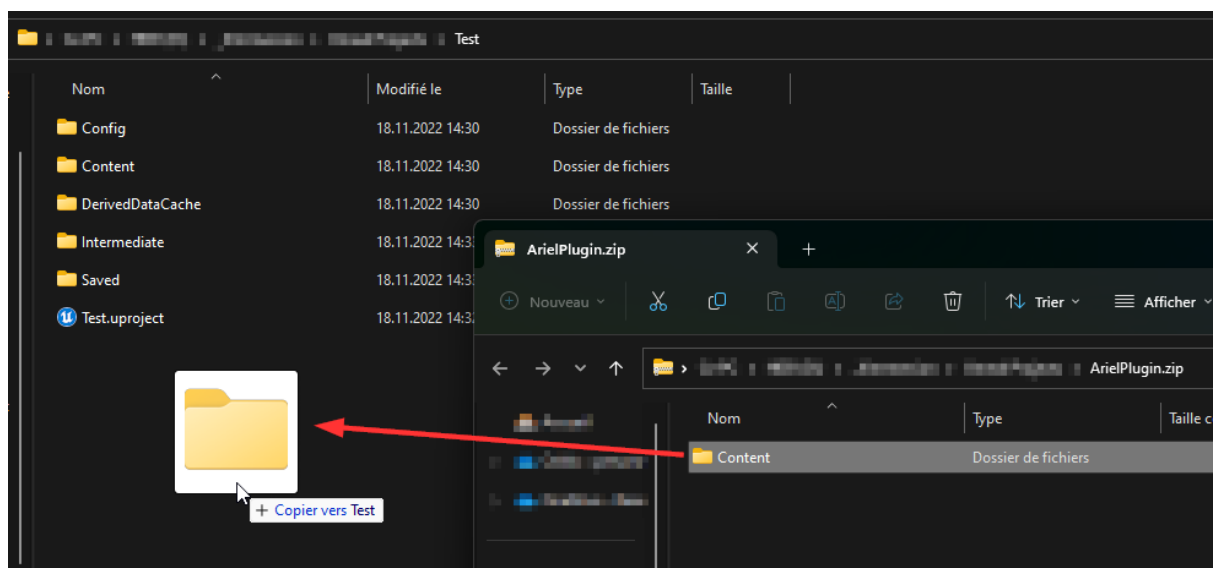

2. How to install the Ariel plug-in

Important : In order for the installation to work, your Unreal Engine project must be closed.

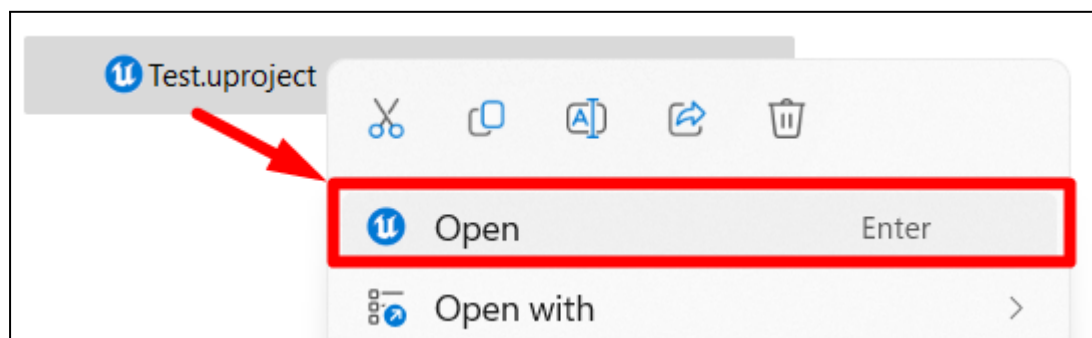

In order to use Ariel in Unreal Engine first you will need to install the plug-in to the Unreal Engine environment.

First, close your unreal engine project !

Extract the content from “ArielPlugin.zip” and paste it to your base project directory.

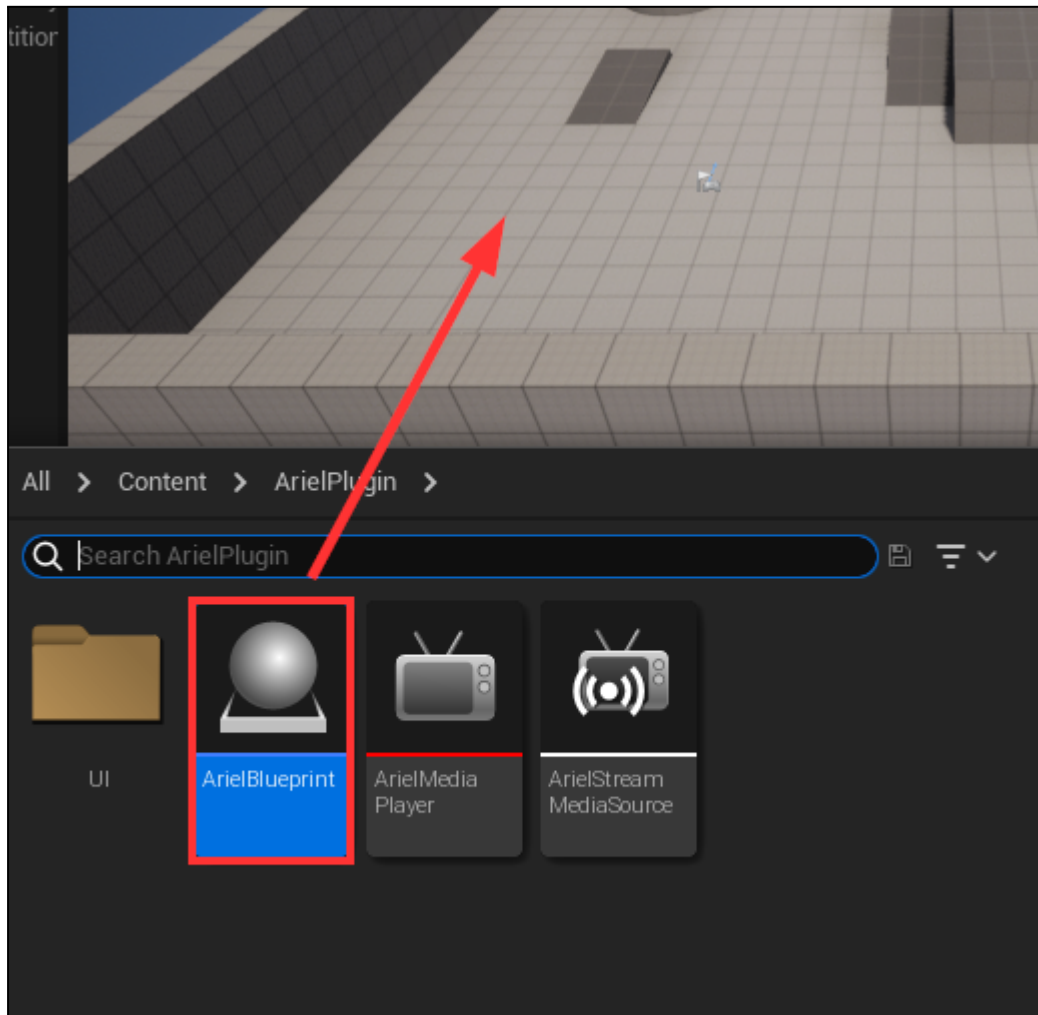

Then, open back your Unreal project (Right click on <Project_name>.uproject > Open)

3. How to use the Ariel plug-in

First add the “ArielBlueprint” actor to your game (located in *Content/ArielPlugin*).

Then customize Ariel’s options.

Inside the actor you will find the following options :

▼ Ariel		
Show Full Logs	☐	
Play on Start	☒	
Stream Audio	☐	
Speaker	Elijah	
Sentence	Hello, I am Elijah	↶
Speed	1.0	
Semitones	0	
Stereo	☒	
Format	wav	

Speaker : Defines the voice used to play the sentence. You can find all available Speakers on the Speaker list part of this document.

Sentence : Defines the sentence that is going to be said by the AI.

Speed : Defines the speed in which the AI will say the sentence.

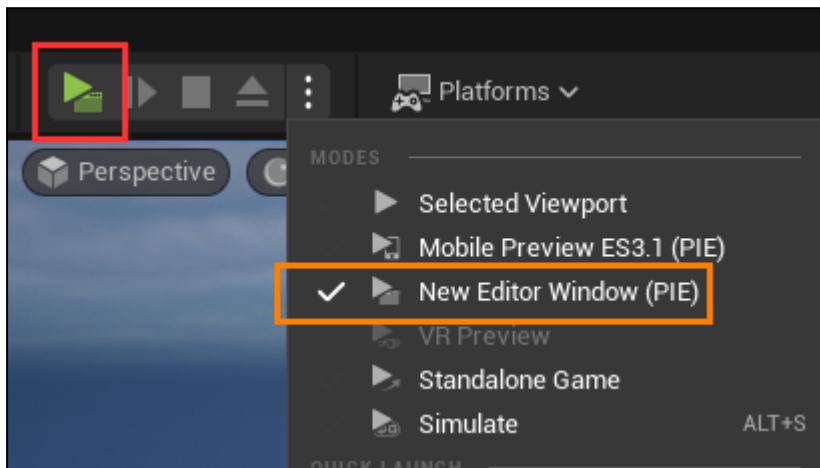

Semitones : Defines the pitch of the voice saying the sentence.

Stereo : Defines if the sound played will be stereo or mono.

Format : Defines the format of the audio played. Supported formats are :

- .wav
- .mp3
- .mp4
- flac

In order to listen to your sentence without playing your game you must select the following option :

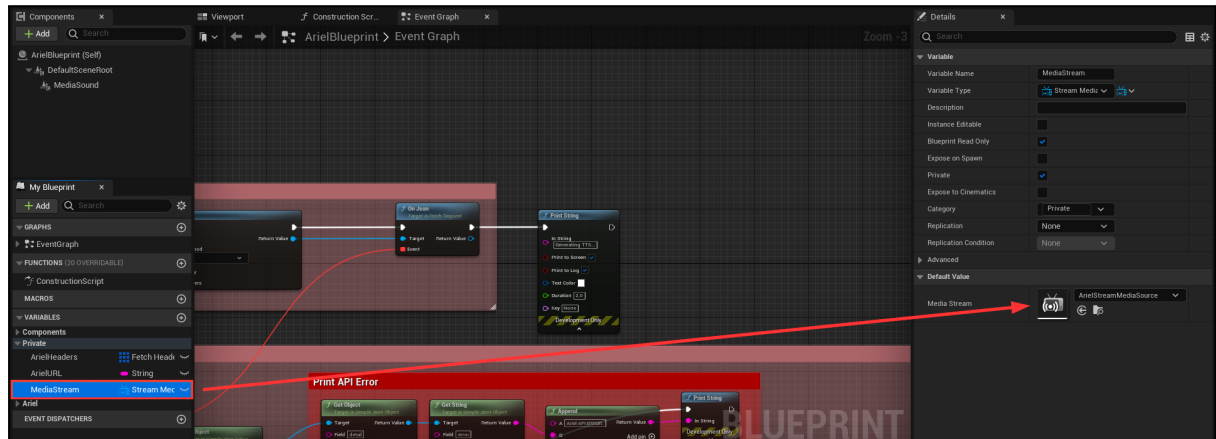

4. Error fixes

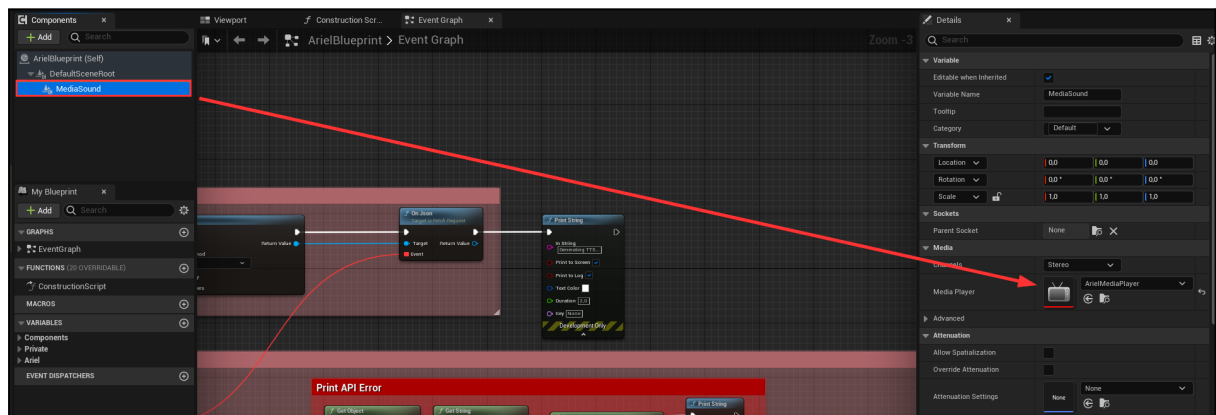

If you have the error “Media Player cannot open audio!”.

Make sure to check that :

- The component “Media Stream” is defined in the ArielBlueprint.

- The component “Media Player” is defined in the ArielBlueprint.
